Smart Enterprise Portal (SEP™)

A secure, scalable messaging and collaboration enterprise portal, that provides an organization a multi dimensional central repository for documents, information and applications which enable employees, partners and customers to work in an interactive environment. Our solution is focused on these few main areas:-

- **Rich Collaboration and Communication Feature** – discussions, forums, surveys and personal and team calendars
- **Document Management** – flexible knowledge based document library with enhanced search features, security and ease of management
- **Employee Self-Service (ESS)** – a platform that allows employees to work effectively from the very own desktop. ESS modules include leave application, resource booking, time sheet, claims and many more
- **News Publishing** – an avenue for employees to publish and maintain news with proper version control and approvals, partners and customers to obtain the latest information or announcements

Smart Enterprise Portal - Solution Modules

atQuest Enterprise Portal

In atQuest Solution, we have successfully roll out numerous Enterprise Portal implementation which integrates and aggregates contents from various composite applications; presenting them in personalized dashboard that can be securely channeled to the Internet, Intranet and also Extranet.

atQuest Enterprise Knowledge Management Portal

atQuest Enterprise Knowledge Management improves our client's ability to create, capture, store, manage and archive mission-critical information and documents. It outlines the conceptual framework to assist our clients in maximizing the value of their existing investment.

atQuest Employee Portal

Most organizations with distributed workforce are faced with the challenge of ensuring effective and efficient information dissemination and management of their employees. The need to provide instant, secure and easy access to employee-centric services such as Staff Directory, Staff Profiles, Employee Self-Services (ESS) and HR related services has been the driving factor in implementation of an Employee Portal.

atQuest SOP Management Portal

atQuest Standard Operating Procedures (SOP) Management Portal is a consolidated application suite that provides full business functions for organizations to address standard operating procedures issues, allowing them to reduce their time and complexity in managing and sharing information.

atQuest SDLC Management Portal

Software Development Life Cycle (SDLC) is the methodology used in the development of an information system. atQuest SDLC Management Portal is the solution that assists the IT project owners to capture, create and manage project documentations based on your existing project document templates. It allows the management of standard project document templates according to your project life cycle phases.

atQuest Document Life Cycle Management Portal

Document Life Cycle is the process that describes how a document is being managed from cradle to grave. atQuest Document Life Cycle Management Portal is infused with capability to manage document templates, document creation, editing, revision, approval and archival.
